

Haolin (Jayden) Xie

Jax008@ucsd.edu • haolinx.github.io • La Jolla, CA

Education

Sep 2025 – Jun 2027 (Expected)

University of California, San Diego – La Jolla, CA

B.S. in Computer Science

Jul 2023 – Jun 2025

San Francisco State University – San Francisco, CA

Coursework toward B.S. in Computer Science; GPA: 3.96/4.00

Experience

Jun 2026 – Present

VisionX – Santa Clara, CA

Full-Stack (Cyber Security) Engineer

- Remediated 26 dependency vulnerabilities and upgraded 8 critical Python packages (incl. Django, Pillow) for a health application handling sensitive data; added image-upload regression tests.
- Restored CI security gates across the pull-request workflow and integrated pip-audit and Dependabot for automated dependency scanning.
- Designed and built an extensible application-layer security monitoring framework from scratch: pluggable detectors, centralized SecurityEvent/Signal models, and fail-open execution.
- Wrote detectors for failed logins and unauthorized sensitive-data access with PHI-safe logging; grew the test suite from 211 to 290 tests at roughly 0.0046 ms/request overhead.

Aug 2024 – Jun 2025

San Francisco State University – San Francisco, CA

Learning Assistant, CSC 215 Intermediate Programming

- Guided 200+ students through Java problems spanning control flow and object-oriented design; debugged student code one-on-one on exceptions and data structures.

Sep 2021 – Jun 2022

SoftCom Lab, Cal Poly Pomona – Pomona, CA

Research Assistant

- Implemented AI/ML algorithms for mobile-app video content extraction, improving accuracy through model evaluation and optimization.
- Integrated trained models with a mobile backend and deployed to the cloud for real-time inference.

Projects

Jul – Aug 2025

CLI Password Manager | *Node.js, MySQL, bcrypt, AES-256-CBC, Inquirer.js*

- Secure command-line credential vault with admin/guest role-based access control; AES-256-CBC encryption with environment-managed keys and bcrypt-hashed authentication; full CRUD over MySQL.

- Feb – Jun 2025 **RAG Chatbot** | *Node.js, MySQL, OpenAI API, Transformers.js, JWT*
- Full-stack Retrieval-Augmented Generation app answering questions over uploaded PDFs using local document embeddings and semantic search; JWT/bcrypt auth with SQL-injection protection.
- Sep 2021 – Jul 2022 **Rz VideoCut** | *Dart, MediaPipe, Python*
- AI-powered cross-platform video editor automating face-tracking and cropping (MediaPipe, multi-face support); launched on the App Store and Google Play.

Publications & Patents

- 2022 **An Intelligent Video Editing Automate Framework using AI and Computer Vision**
Haolin Xie and others.
International Conference on Information Technology Convergence and Services (ITCSE 2022).
- Jul 2022 **U.S. Patent** – United States Patent and Trademark Office (USPTO)
Granted for the Rz VideoCut intelligent video-editing framework.

Skills

- Languages Python, Java, C/C++, JavaScript, SQL, HTML/CSS, Bash
- Frameworks Node.js, Express.js, OpenAI API, Transformers.js, MediaPipe, JWT, bcrypt
- Tools Git/GitHub, MySQL, Android Studio, Linux, VS Code
- Concepts REST APIs, Retrieval-Augmented Generation, AES Encryption, Vector Embeddings, Semantic Search
